## **PRESS RELEASE**

Release Date: 2023 January 24<sup>th</sup>

Re: Extortion Threats and NVIDIA CORPORATION DATA CENTER Activity

Following over one-hundred separate threats to extort November 2022 to January 13<sup>th</sup> 2023, it is the finding that NVIDIA CORPORATION notice of “intent to compete as a SaaS” based subscription and hardware exclusive product offer is unfair.

Nexus of such companies in 2017-2023 preceding the September 2022 announcement of clearly infringing trademark use targeting Oklahoma Trademark No 12341878, in launch of NVIDIA Omniverse and Nvidia 4080 series RTX technology with limited access to Dallas TX and San Jose CA data centers; paired with tone of communication to EVGA CORPORATION and RACCOON TECHNOLOGIES INCORPORATED, violate fair market practices and vendor neutral specifications requirements for our product offering.

Specific risks of platform dependency upon NVIDIA CORPORATION, paired with its infrastructure software and hardware as a subscription data-center based product; disqualify NVIDIA CORPORATION from consideration or bidding on MANIFOLD SPACE ENGINE servers, software, and network infrastructure requirements.

The aggressive, abusive, sexist, and defamatory false claims made by 2323 Bryan St Suite 2670 in violation of ORDERED POSSESSION of a child and fraud to extort, further enjoin this activity to abuse of IANA.ORG services and ICANN services in unfair business practices defined in Title 78 Oklahoma Statutory law; to require RACCOON TECHNOLOGIES INCORPORATED to issue a determination of sanctions barring use of NVIDIA CORPORATION hardware and software on Beyond War™ and M2OS platforms.

Use of “XGS Orion” to impersonate prior “AGS Heavy Machines™” role and purpose, further appears to be reverse engineering of existing server equipment in design and name, to deny entry of this product or its incorporation as part of the RACCOON TECHNOLOGIES INCORPORATED cloud for SEVEN ALPHA™ networks.

Misdirection to pretend to be a hardware vendor, in clear development of intent to compete as a service vendor in direct competition and with foreign sovereign government backing through monopoly practices, are evident in the conduct toward EVGA CORPORATION and ongoing April 2022 to January 2023 threats by EQUINIX and DIGITAL REALTY TRUST INC. data centers in concert with NVIDIA CORPORATION partner announcements.

Effort to style these illicit moves as “conspiracy theories” by employees of NTT COMMUNICATION and COGENT COMMUNICATIONS INC. contractors, on defamation and vandalism, further sustains our decision to void all hardware support for NVIDIA PRODUCTS in the near term and disable software based on those products.
